

ARCHITECTURE

OUR SERVICES

Our architecture team provides clients with a concept-to-completion bespoke design service, all provided by an award-winning team across Scotland.

At Savills, we establish a clear brief from the outset, developing a thorough understanding of our clients' needs, offering quality bespoke design and effective delivery solutions. Throughout the life of the project, we continually review practices and processes to ensure all set objectives are met.

Savills Architecture have the experience and capacity to undertake projects of all sizes and have been doing so for a diverse range of clients across the public, private, community and charitable sectors.

In recent years, we have been involved in the conservation and alteration of a number of listed and historic buildings, where a sensitive design approach is required, in order to retain their character whilst imaginatively and innovatively addressing their new purpose. A number of projects have won design awards or have been shortlisted.

Our design philosophy is driven by a dynamic and sensitive approach to Architecture, focusing on delivering high-quality, practical, innovative and intensely human places and spaces. We aim to produce sustainable and contextual design solutions that respond strongly to local cultural, historical and landscape settings.

How can we help you?

- Bespoke house designs
- Interior design
- 3D modelling & visualisations
- Historic and listed buildings
- Conversions
- House extensions
- Refurbishments
- Urban design
- Masterplanning
